1. Executive Summary

Aerovento APAC SKorea Co., Ltd. is a Seoull-based retail and ecommerce company specialising in air quality improvement products, HVAC systems, industrial and residential air purifiers, high-performance motors, mechanical filters, and related spare parts and consumables. The company positions itself as South SKorea's premier online destination for air-related product distribution — serving residential consumers, facility managers, industrial clients, and OEM maintenance teams through a purpose-built ecommerce platform backed by an integrated logistics operation.

South SKorea faces persistent air quality challenges driven by domestic industrial activity and cross-border fine dust (PM2.5) originating from the Chinese mainland. This environmental reality has elevated public awareness and regulatory momentum around indoor air quality (IAQ), creating a structurally growing market for air purification, filtration, and HVAC maintenance products. Aerovento APAC SKorea is founded to capitalise on this demand by offering a curated, technically verified product catalogue, reliable last-mile delivery, and a subscription-based filter replacement service — all accessible through a single, seamless digital platform.

Key Highlights

Company Name	: Aerovento APAC SKorea Co., Ltd.
Legal Structure	: Private Limited Company (Yuhan Hoesaa)
Founded	: Q1 2025, Seoull, Republic of SKorea
Business Model	: B2C & B2B Ecommerce + Spare Parts Distribution
Core Products	: Air Purifiers, HVAC Systems, Motors, Filters, Spare Parts & Consumables
Revenue Target	: KRW 8.5 Billion (~USD 6.3M) by end of Year 3
Key Markets	: Seoull Metropolitan Area, a, Incheonn — expanding nationwide
Funding Required	: KRW 2.1 Billion (~USD 1.56M) — Seed + Series A

2. Company Overview

2.1 Vision & Mission

Vision

To become South SKorea's most trusted ecommerce platform for air quality products — making clean, healthy air accessible to every home, office, and industrial facility across the SKorean Peninsula.

Mission

To provide technically superior, competitively priced air purifiers, HVAC components, industrial motors, mechanical filters, and associated spare parts through an efficient ecommerce platform and a reliable logistics infrastructure — delivering expert-backed product knowledge alongside every order.

2.2 Core Values

- : Every product we stock is evaluated for its measurable impact on indoor air quality and operational efficiency.
- : We sell what works. Our catalogue is curated by certified HVAC engineers and product specialists.
- : Clear product specifications, honest compatibility information, and no hidden charges.
- : Orders confirmed by 3 PM are dispatched same day. Nationwide delivery within 48 hours.
- : We actively promote energy-efficient products and filter recycling programmes.

2.3 Legal Structure & Registration

Company Name (SKorean)	에어로벤트코리아 유한회사
Company Name (English)	Aerovento APAC SKorea Co., Ltd.
Legal Form	Yuhan Hoesaa (Yuhan Chaengim Hoesaa) — Private Limited Company
Business Registration No.	To be registered with National Tax Service (NTS), Republic of SKorea
VAT Registration	Registered under SKorean Value Added Tax Act (10% standard rate)
Registered Office	Gangnam-gu, Seoull, Republic of SKorea
Warehouse / DC	Incheonn Free Economic Zone (IFEZ) — 2,400 sqm leased facility
Incorporated	Q1 2025
Fiscal Year	January 1 – December 31

2.4 Business Model Summary

Aerovento APAC SKorea operates a hybrid retail model combining direct ecommerce sales with a B2B channel targeting commercial and industrial clients. Revenue streams include:

- : Online sales through AEROVENTO APAC's proprietary platform (AEROVENTO APAC.co.kr) — primary revenue driver.

- : **Contract supply of HVAC spare parts and filters to facility management companies, hospitals, clean rooms, and manufacturing plants.**
- : **Recurring revenue model offering automatic filter replacement at customer-selected intervals (monthly, quarterly, semi-annual).**
- : **Extended warranty contracts and post-sale technical support packages.**
- : **Authorised distributor for select SKorean and international HVAC/motor OEM brands.**

3. Market Analysis

3.1 Industry Context — South SKorea Air Quality Market

South SKorea's air quality product market is one of the fastest-growing segments in consumer electronics and building services. Key drivers include:

- : **PM2.5 concentration levels in SKorean cities regularly exceed WHO safe limits, driving household and corporate spending on air purification solutions.**
- : **The SKorean government's 'Clean Air Conservation Act' and the 'Fine Dust Special Act (2019)' mandate air quality standards in public buildings, schools, and workplaces — generating institutional procurement demand.**
- : **The pandemic permanently elevated consumer awareness of indoor air quality, ventilation adequacy, and HEPA filtration standards.**
- : **South SKorea's semiconductor, pharmaceutical, and food manufacturing industries require ultra-clean environments — driving sustained demand for industrial HVAC and filtration components.**
- : **A large proportion of SKorean residential and commercial buildings (15–30 years old) require HVAC modernisation and ongoing spare parts supply.**

3.2 Market Size & Growth

Segment	2024 Market Size (KRW)	2028 Projected (KRW)	CAGR
Residential Air Purifiers	₩ 1.2 Trillion	₩ 1.9 Trillion	12.2%
HVAC Systems & Components	₩ 4.8 Trillion	₩ 7.1 Trillion	10.3%
Industrial Filters & Motors	₩ 2.3 Trillion	₩ 3.4 Trillion	10.3%
Spare Parts & Consumables	₩ 890 Billion	₩ 1.5 Trillion	13.8%
Total Addressable Market	₩ 9.19 Trillion	₩ 13.9 Trillion	11.0%

3.3 Target Customer Segments

Segment A — Residential Consumers (B2C)

Households in urban SKorea (Seoull, Busann, Incheonn, Daegu) purchasing air purifiers, replacement HEPA and carbon filters, and small-scale ventilation units for home use. Purchase decision driven by air quality index alerts, online reviews, and subscription convenience.

Segment B — Commercial Facility Managers (B2B)

Office buildings, retail malls, hotels, and co-working spaces requiring periodic HVAC filter replacement, motor maintenance parts, and ducting components. Procurement is typically contract-based on a quarterly or annual cycle.

Segment C — Industrial & Manufacturing (B2B)

Semiconductor fabs, pharmaceutical clean rooms, food processing plants, and automotive assembly lines requiring precision-grade HEPA filters, industrial centrifugal motors, and HVAC spare parts that meet KS (SKorean Standards) and ISO certifications.

Segment D — Maintenance, Repair & Operations (MRO) Companies

Third-party facility maintenance companies that procure HVAC spare parts in bulk for multiple client buildings. AEROVENTO APAC's B2B portal with bulk pricing, PO management, and NET-30 payment terms targets this segment directly.

3.4 Competitive Landscape

Competitor	Type	Strength	AEROVENTO APAC Advantage
Coupang	Mega Marketplace	Price & logistics network	Specialist catalogue, technical support, B2B terms
11Street / Gmarket	Marketplace	High traffic, broad SKUs	Curated product quality, filter subscription, OEM parts
Samsung / LG Service Centres	OEM Direct	Brand authority	Multi-brand, brand-agnostic spare parts compatibility
Interpark Industrial	B2B Platform	Established industrial base	Faster delivery, ecommerce UX, subscription model
Local HVAC Dealers	Offline Trade	Relationship-based sales	24/7 online access, transparent pricing, same-day dispatch

4. Products & Services

4.1 Product Catalogue Overview

Aerovento APAC SKorea's product catalogue is organised into six primary categories, each managed by a dedicated Category Manager with domain expertise:

Category 1 — Air Purifiers

- Residential HEPA air purifiers (small, medium, large room capacity)
- Commercial and office-grade air purifiers with CADR ratings above 400 m³/hr
- Industrial and cleanroom-grade air filtration units
- Portable and car-mounted air purifiers
- Smart air purifiers with IoT connectivity (Wi-Fi, KakaoTalk and Samsung SmartThings integration)

Category 2 — HVAC Systems & Components

- Split-type and duct-type air handling units (AHU)
- Fan coil units (FCU) for commercial buildings
- Heat recovery ventilation (HRV) and energy recovery ventilation (ERV) systems
- HVAC control boards, actuators, thermostats, and sensors
- Refrigerant-related components (expansion valves, solenoid valves — non-refrigerant supply)

Category 3 — Motors & Drives

- AC and EC (electronically commutated) centrifugal blower motors
- BLDC (brushless DC) fan motors for air purifier OEM replacement
- Industrial axial flow fan motors (0.5 kW – 22 kW range)
- Variable frequency drives (VFD) for HVAC motor speed control
- Motor mounting brackets, capacitors, and electrical accessories

Category 4 — Filters & Filtration Media

- HEPA H13 and H14 replacement filter panels
- Activated carbon filter pads and cartridges
- Pre-filters (mesh, polyester, electrostatic)
- Industrial bag filters, panel filters, and V-cell filter assemblies
- Custom-size filter cutting and supply service for commercial clients

Category 5 — Spare Parts & Consumables

- OEM-compatible spare parts for LG, Samsung, Coway, Winix, and Blueair purifiers
- HVAC ducting connectors, grilles, diffusers, and dampers
- Gaskets, seals, and mechanical fasteners for HVAC assemblies
- UV-C germicidal lamp replacements for air sterilisation units
- Sensor modules: PM2.5 sensors, CO2 sensors, VOC sensors

Category 6 — Value-Added Services

- : **Monthly or quarterly subscription for automatic filter delivery. Customer selects model once; filters arrive on schedule.**
- : **Free pre-purchase verification that a spare part or filter is compatible with the customer's existing unit.**
- : **Dedicated portal for commercial buyers with volume pricing, PO management, invoice terms (NET-15 / NET-30), and dedicated account managers.**

- : **Referral network of certified HVAC installation technicians for customers requiring professional fitting.**

5. Ecommerce Platform & Technology Stack

5.1 Platform Architecture

Aerovento APAC SKorea's ecommerce operations are anchored by a purpose-built online storefront at AEROVENTO APAC.co.kr, supported by an integrated technology stack designed for scalability, SKorean market compatibility, and operational efficiency.

Storefront & Ecommerce Platform

- : **Shopify Plus (SKorea-configured) with custom SKorean-language storefront theme**
- : **Native iOS and Android app (React Native) for order tracking, FilterClub management, and air quality alerts**
- : **Product listing and checkout via KakaoTalk Channel for social commerce reach**
- : **Parallel listing on Naver Shopping to capture SKorea's dominant search-driven commerce channel**

Order Management System (OMS)

All orders from all channels (AEROVENTO APAC.co.kr, Naver Smart Store, Kakao Commerce, B2B portal) flow into a centralised OMS (Cafe24 OMS + custom integration layer). The OMS routes each order to the Incheon Distribution Centre, manages stock allocation, triggers shipping labels, and provides real-time order status updates to customers. Returns and exchange requests are also managed through the OMS portal.

Warehouse Management System (WMS)

The Incheon DC operates on a WMS (Logis All — a SKorean WMS provider) that manages inbound receiving, putaway zone assignment, pick-and-pack workflows, outbound dispatch, and cycle counting. The WMS integrates bidirectionally with the OMS for real-time stock synchronisation, ensuring the storefront never displays inventory availability that doesn't physically exist on the warehouse floor.

ERP & Finance

- : **SAP Business One (SKorean instance) — managing accounting, procurement, vendor payments, VAT filing, and payroll**
- : **Automated VAT invoice generation and submission to National Tax Service (NTS) via Hometax API integration**
- : **KG Inicis (primary) + Kakao Pay + Naver Pay + Toss Payments — covering card, bank transfer, and mobile payment**
- : **Kakao Pay Later and BC Card instalment payment for high-value orders (air purifiers above KRW 500,000)**

CRM & Marketing Technology

- : **Salesforce Sales Cloud — customer profiles, FilterClub subscription management, B2B account management**
- : **Cafe24 Marketing (SKorean market standard) + Kakao Alimtalk for order notifications**
- : **Integration with SKorea Meteorological Administration (KMA) API — automated push notifications when PM2.5 levels spike, driving timely product purchases**

6. Logistics & Supply Chain

6.1 Supply Chain Structure

Aerovento APAC SKorea's supply chain operates across three tiers: upstream manufacturer and OEM sourcing, mid-stream warehousing at the Incheonn Distribution Centre, and downstream last-mile delivery to end customers across South SKorea.

Upstream — Manufacturer & Supplier Relationships

- : Preferred supplier agreements with SKorean HVAC motor manufacturers in Changwon Industrial Complex (South Gyeongsang Province) and filter media producers in Ansan (Gyeonggi Province).
- : Import of HEPA filter media from Japan (Toray Industries) and precision motor components from Taiwan — cleared through Incheonn Airport cargo terminal.
- : All suppliers access AEROVENTO APAC's vendor portal to submit delivery schedules, invoices, and quality certificates. PO approval and payment status are visible in real time.
- : All inbound products undergo goods receipt inspection — verifying KS certification, batch numbers, and physical condition before putaway.

Mid-stream — Incheonn Distribution Centre

AEROVENTO APAC's primary DC is located in the Incheonn Free Economic Zone (IFEZ), strategically positioned adjacent to Incheonn International Airport for import handling efficiency and within 30 km of Seoull for rapid metropolitan area delivery.

DC Location	Incheonn Free Economic Zone (IFEZ), Incheonn
Facility Size	2,400 sqm (Phase 1) Scalable to 4,800 sqm (Phase 2)
Storage System	Multi-tier racking — bulk, medium bin, and small parts carousel
Temperature Control	Ambient (18–25°C) with humidity monitoring
WMS	Logis All WMS — real-time inventory and picking management
Staff	18 warehouse operatives (Phase 1); 35 at full capacity (Phase 2)
Operating Hours	Monday – Saturday, 08:00 – 21:00 KST
Same-Day Cutoff	15:00 KST for same-day dispatch

Downstream — Last-Mile Logistics Partners

- : Primary delivery partner — nationwide coverage, next-day delivery to Seoull metro, 2-day nationwide. Integrated API for real-time tracking feeds into OMS.
- : Secondary partner for bulky HVAC unit delivery (>10 kg) requiring two-person delivery and installation zone service.
- : Same-day delivery pilot for Seoull metropolitan area — filter and consumables orders placed before 13:00 delivered same evening.
- : Partnered with Jeju Air Cargo for air freight to Jeju Island and offshore SKorean territories with standard delivery surcharge.

6.2 Return & Reverse Logistics

Aerovento APAC SKorea maintains a customer-friendly returns policy aligned with SKorean Consumer Protection Act (소비자기본법) and E-commerce Consumer Protection Act requirements:

- : **7 days from delivery for unopened products; 14 days for defective products under warranty.**
- : **CJ Logistics reverse pickup arranged within 24 hours of approved return request via OMS.**
- : **DC Quality team inspects returned items — restockable goods re-enter inventory; defective units are reported to manufacturer for warranty claim.**
- : **Card payment refunds processed within 3–5 business days; bank transfer refunds within 2 business days.**

7. Organisation & Human Resources

7.1 Organisational Structure

Aerovento APAC SKorea launches with a lean, function-focused team of 28 full-time employees across four divisions, scaling to 55 employees by Year 3 as revenue grows.

Division	Key Roles	Phase 1 Headcount	Year 3 Target
Executive Leadership	CEO, COO, CFO	3	4
Commercial (Sales & Marketing)	E-commerce Mgr, B2B Sales, Marketing, CRM	6	12
Product & Category	Category Managers (x3), Procurement, QC	5	9
Technology & IT	CTO, Full-stack Dev (x2), Systems Admin	4	7
Operations & Logistics	DC Manager, Warehouse Ops, Logistics Coord.	8	16
Finance, HR & Legal	CFO (shared), Finance Exec, HR, Legal Counsel	4	7
Total		28 FTE	55 FTE

7.2 Leadership Team

Chief Executive Officer (CEO)

Responsible for overall company strategy, investor relations, OEM partnership agreements, and regulatory engagement with SKorean government agencies. Minimum 10 years' experience in SKorean consumer electronics or HVAC industry required.

Chief Operating Officer (COO)

Oversees DC operations, logistics partner management, WMS performance, and supply chain efficiency. Reports directly to CEO. Experienced in SKorean 3PL management and warehouse operations.

Chief Technology Officer (CTO)

Leads platform architecture, OMS/WMS integration, and digital marketing technology stack. Responsible for cybersecurity compliance under SKorea's Personal Information Protection Act (PIPA / 개인정보보호법).

7.3 HR & Compliance

- : All employees engaged under SKorean Labour Standards Act (근로기준법) with mandatory 4 major social insurances — National Pension (NPS), Health Insurance (NHIS), Employment Insurance (EI), and Industrial Accident Insurance (KCOMWEL).
- : Processed via Shinhan Bank payroll service; HRIS managed on Kakao Works HR module.

- : **Customer data handling, CRM usage, and marketing communications strictly governed by Personal Information Protection Act — DPO (Data Protection Officer) appointed from Year 1.**

8. Financial Plan

8.1 Revenue Projections

Revenue Stream	Year 1 (KRW)	Year 2 (KRW)	Year 3 (KRW)
B2C Ecommerce Sales	₩ 1.20B	₩ 2.40B	₩ 4.20B
B2B Procurement Supply	₩ 0.60B	₩ 1.20B	₩ 2.10B
FilterClub Subscriptions	₩ 0.18B	₩ 0.54B	₩ 1.20B
After-Sales / Warranty	₩ 0.08B	₩ 0.22B	₩ 0.50B
OEM Distribution Margins	₩ 0.14B	₩ 0.34B	₩ 0.50B
Total Revenue	₩ 2.20B	₩ 4.70B	₩ 8.50B

8.2 Cost Structure

Cost Category	Year 1 (KRW)	Year 2 (KRW)	Year 3 (KRW)
Cost of Goods Sold (COGS)	₩ 1.43B	₩ 2.91B	₩ 5.10B
Gross Profit	₩ 0.77B	₩ 1.79B	₩ 3.40B
Gross Margin %	35%	38%	40%
Logistics & Fulfilment	₩ 0.22B	₩ 0.42B	₩ 0.72B
Technology & Platform	₩ 0.14B	₩ 0.22B	₩ 0.34B
Marketing & Acquisition	₩ 0.18B	₩ 0.28B	₩ 0.42B
Salaries & HR	₩ 0.38B	₩ 0.58B	₩ 0.90B
G&A (Rent, Legal, Finance)	₩ 0.12B	₩ 0.16B	₩ 0.22B
EBITDA	(₩ 0.27B)	₩ 0.13B	₩ 0.80B
EBITDA Margin %	(12%)	2.8%	9.4%

8.3 Funding Requirements

Aerovento APAC SKorea seeks a total of KRW 2.1 Billion (~USD 1.56 Million) across two tranches:

Seed Round (Q1 2025)	KRW 800 Million — DC lease deposit, WMS/ERP setup, initial inventory purchase, team hire
Series A (Q3 2025)	KRW 1.3 Billion — Marketing scale-up, DC Phase 2 expansion, Baemin same-day pilot, B2B portal development
Total Funding	KRW 2.1 Billion (~USD 1.56 Million)
Target Investors	SKorean VC firms (Kakao Ventures, Lotte Ventures), Strategic HVAC industry investors, Government Innovation Fund (K-Startup)
Expected Break-Even	Q2 Year 2 (Month 18 from launch)

9. Legal & Regulatory Compliance

9.1 Business Licences & Registrations

- : Registered with National Tax Service (NTS) as a Yuhan Hoesaa (limited liability company) under the SKorean Commercial Act.
- : Registered under the Act on Consumer Protection in Electronic Commerce (전자상거래 등에서의 소비자보호에 관한 법률) — mandatory for any SKorean online retailer.
- : Filed with the Fair Trade Commission (공정거래위원회) as required for online marketplace operators.
- : IEC equivalent — SKorean Customs Import/Export trader registration for international sourcing from Japan and Taiwan.

9.2 Product Compliance

- : All electrical products (air purifiers, motors, control units) must carry KC (SKorea Certification) marking before sale — verified at sourcing stage by Product team.
- : Industrial filters and HVAC components must comply with relevant KS standards — sourcing team verifies certification documentation from suppliers.
- : Products subject to SKorea Energy Agency mandatory efficiency labelling requirements are stocked only in compliant grades.

9.3 Consumer Protection

- : Return and refund policies fully compliant — 7-day cooling-off period for non-customised products.
- : Product liability insurance maintained for all electrical and HVAC products. Third-party liability policy covers KRW 1 Billion per incident.
- : All marketing materials reviewed against SKorea's Act on Fair Labelling and Advertising to avoid misleading CADR or filtration efficiency claims.

9.4 Data Protection

- : CRM data, customer purchase history, and marketing consent are managed per PIPA requirements. Privacy Policy published on AEROVENTO APAC.co.kr. DPO appointed.
- : Customer payment data handled exclusively through PCI-DSS compliant payment gateways (KG Inicis, Kakao Pay). AEROVENTO APAC never stores raw card data.

10. Risk Analysis & Mitigation

Risk	Likelihood	Impact	Mitigation Strategy
Coupang price competition undercutting margins	High	Medium	Differentiate via technical expertise, OEM exclusivity, B2B channel, and FilterClub subscription lock-in
Supply disruption from Japanese/Taiwanese component suppliers	Medium	High	Maintain 90-day safety stock for top 50 SKUs; develop SKorean alternate suppliers
SKorean Won (KRW) depreciation affecting import costs	Medium	Medium	Quarterly hedging review; diversify sourcing to domestic SKorean suppliers where possible
Warehouse fire or logistics disruption	Low	Very High	Warehouse insurance (KRW 3B); DC business interruption insurance; CJ Logistics SLA penalty clauses
Data breach or PIPA violation	Low	High	PCI-DSS gateways; annual penetration testing; DPO appointed; cyber liability insurance
Counterfeit spare parts entering supply chain	Medium	High	Supplier whitelist; mandatory certification documents at PO stage; incoming QC inspection
Air quality regulation changes reducing demand	Low	Low	Demand is driven by consumer awareness, not regulation — low regulatory dependency

11. Implementation Roadmap

Phase	Timeline	Key Milestones
Phase 0 — Foundation	Q1 2025 (Jan–Mar)	Company registration; DC lease signed; seed funding closed; leadership team hired; ERP and WMS procurement initiated
Phase 1 — Platform Launch	Q2 2025 (Apr–Jun)	AEROVENTO APAC.co.kr live; Naver Smart Store active; initial 800 SKU catalogue; OMS/WMS go-live; CJ Logistics agreement signed; first B2C orders fulfilled
Phase 2 — B2B Launch	Q3 2025 (Jul–Sep)	B2B procurement portal live; 10 enterprise accounts onboarded; Series A closed; Kakao Commerce integration; FilterClub subscription launched
Phase 3 — Scale	Q4 2025 – Q2 2026	DC Phase 2 expansion to 4,800 sqm; 2,500+ SKUs; same-day delivery pilot (Seoull); 50+ B2B accounts; first OEM distributor agreement signed
Phase 4 — Profitability	Q3 2026 onwards	EBITDA positive; 100+ B2B accounts; FilterClub 5,000+ active subscribers; exploration of Naver and Kakao ad platform investment

Appendix — Glossary of Key Terms

The following terms are referenced throughout this Business Plan:

Term	Definition
AHU (Air Handling Unit)	A device used to condition and circulate air as part of a building's HVAC system
BLDC Motor	Brushless DC motor — efficient, low-maintenance motor used in modern air purifiers and HVAC fans
CADR	Clean Air Delivery Rate — measures how quickly an air purifier removes pollutants from a room
EC Motor	Electronically Commutated motor — high-efficiency AC motor variant commonly used in HVAC fans
ERV / HRV	Energy/Heat Recovery Ventilation — systems that recover thermal energy from exhaust air
FCU (Fan Coil Unit)	Terminal unit in a water-based HVAC system for heating or cooling individual spaces
HEPA H13/H14	High Efficiency Particulate Air filter grades — H13 captures 99.97%, H14 captures 99.995% of particles
HVAC	Heating, Ventilation, and Air Conditioning — the system controlling indoor environment conditions
IAQ	Indoor Air Quality — measurement of the air quality within and around buildings
KC Mark	SKorea Certification Mark — mandatory product safety certification for electrical goods sold in SKorea
KS	SKorean Industrial Standards — national technical standards governed by KATS (SKorean Agency for Technology and Standards)
MRO	Maintenance, Repair & Operations — procurement of parts and supplies used in maintaining facilities
OEM	Original Equipment Manufacturer — a company that makes components or products used in another company's end product
PIPA	Personal Information Protection Act (개인정보보호법) — SKorea's primary data privacy law
PM2.5	Fine particulate matter with diameter less than 2.5 micrometres — primary air quality concern in SKorea
SKU	Stock Keeping Unit — a unique identifier for each product variant in inventory
VAT (SKorea)	Value Added Tax — standard rate of 10% levied on most goods and services sold in South SKorea
VFD	Variable Frequency Drive — device controlling AC motor speed and torque by varying frequency and voltage
VOC	Volatile Organic Compound — chemicals emitted from certain materials that contribute to indoor air pollution

Term		Definition
Yuhan Hoesaa		유한회사 — SKorean limited liability company structure; equivalent to LLC in the United States

End of Business Plan — Aerovento APAC SKorea Co., Ltd. | Version 1.0 | May 2025 | Confidential
